PROJECTS

Courseva – *HTML, CSS, JavaScript*
Developed an online course-rating platform designed to help learners evaluate programming and development courses based on clear, structured criteria such as course quality, instructor performance, practical exercises, ease of understanding, and available support resources. Implemented a rating system from 0–5 and created an intuitive front-end interface for users to explore and review courses.

Packers and Movers Website (Family Business Support Project) – *AI Tools: Lovable, Bolt, GitHub*
Created an online presence for a real packers and movers business using AI-enhanced development tools. Designed the layout, structure, and content to represent real services available on Google. Built an accessible digital platform to help customers discover services, request bookings, and learn about the business.

EXPERIENCE

Academic Experience
As a motivated Computer Science Engineering student, actively engaged in hands-on projects, technical skill-building, college club activities, and self-initiated learning through online platforms. Demonstrated consistent commitment to practical implementation, teamwork, leadership roles, and adopting modern development tools to enhance productivity.
